ABOUT ME

As a passionate Frontend Developer with experience in the insurance and medical industries, I strive to create web applications that not only meet the technical requirements but provide the user with an enjoyable experience. With a commitment to quality, I focus on creating functional and attractive applications, to ensure I have fun while building, and others have fun using the products that I work on.

EXPERIENCE

Frontend Developer at Zurich Insurance Group in Vienna
August 2023 – Today

My main responsibilities:

- Development of Customer Portal and calculators for employees and customers
- Implementation of new features or modification of existing ones based on acceptance criteria defined in user stories
- Resolving bugs in the software
- Development of end-to-end UI-tests and unit-tests
- Enhancement of software performance through code refactoring
- Continuous learning through detailed code reviews
- Daily cooperation with backend developers, requirement engineers, business analysts and testers

Language used:
German

Technologies used for the Frontend:
Next.js, React, Typescript, Material UI und Styled components, Css, Yup, Recoil

Testing libraries used:
Playwright for end-to-end tests, Vitest for unit-tests

Frontend Developer at Veeva Systems Kft. in Budapest
January 2023 – August 2023

My main responsibilities:

- Medical dashboard development
- Development of sales application for sales reps of Astra Zeneca, with emphasis on responsive design
- Resolving bugs in the software
- Enhancement of software performance through code refactoring
- Daily cooperation with an international team of developers and business analysts

Language used:
English und Hungarian

Technologies used for the Frontend:
React, Javascript, Recoil, Tailwind, Css
For the database we used Salesforce together with SQL, with the help of querys.

Software Developer at Accenture Hungary Kft. in Budapest
November 2022 – December 2022

My main responsibilities:
- Scripting of low-code-softwaremodules, that were then later on used in bookkeeping software
- Daily reporting
- Daily collaboration with a team of Hungarian engineers

Language used:
English und Hungarian

For the development of the scripts I used:
Javascript, HTML, Css

Process Developer at Audi Hungaria Zrt. in Györ
April 2016 – November 2022

My main responsibilities:
- Development and maintenance of organizational processes
- Supervision of organizational unit in following areas: preparation of decision making, consulting
- Conducting internal audits / audit preparation

HOBBY PROJECTS

Here are the projects on which I work in my free time, for fun.

AirBnb Clone

An application inspired by AirBnb. The app has features like: user authentication, payment integration, user profiles, booking system, search function, data validation and admin interface.

Technologies used for the frontend:

Next.js, React, Typescript, Shadcn as UI Library, Zod for data validation,
Technologies for the backend:
PostgreSQL as Database, Prisma for Queries, Stripe for Payment, Clerk for user authentication.
