About me

Hello, I am Gergö, a passionate React Developer from Hungary. I live approximately 1 Hour away from Vienna, and I speak fluent German and English.
With the experience I gained in the insurance and medical industries, I strive to create web applications that not only meet the technical requirements, but also provide the user with an enjoyable experience. I focus on creating functional and attractive applications, ensuring I have fun building, and users enjoy using.

Experience

Frontend Developer at Marshmallow
Budapest, Hungary / Hybird
February 2025 – Today

My main responsibilities:

- Development of backoffice portal for employees
- Implementation of new features and components
- Resolving bugs
- Development of end-to-end UI tests and unit tests
- Code refactorings, to improve performance

Language used:
English

Technologies I used for the Frontend:
React, Typescript, Styled components, CSS, Zod

Testing libraries used:
Playwright for end-to-end tests, React-Testing-Library for unit-tests

Frontend Developer at Zurich Insurance Group
Vienna, Austria / Hybrid
August 2023 – January 2025

My main responsibilities:
- Development of Customer Portal and calculators for employees and customers
- Implementation of new features or modification of existing ones based on acceptance criteria defined in user stories
- Resolving bugs in the software
- Development of end-to-end UI-tests and unit-tests
- Enhancement of software performance through code refactoring
- Continuous learning through detailed code reviews
- Daily cooperation with backend developers, requirement engineers, business analysts and testers

Language used:
German

Technologies used for the Frontend:
Next.js, React, Typescript, Material UI und Styled components, CSS, Yup, Recoil

Testing libraries used:
Playwright for end-to-end tests, Vitest for unit-tests

Frontend Developer at Veeva Systems Kft.
Budapest, Hungary / Remote
January 2023 – August 2023

My main responsibilities:
- Medical dashboard development
- Development of sales application for sales reps of AstraZeneca, with emphasis on responsive design
- Resolving bugs in the software
- Enhancement of software performance through code refactoring
- Daily cooperation with an international team of developers and business analysts

Language used:
English and Hungarian

Technologies used for the Frontend:
React, Javascript, Recoil, Tailwind, CSS
For the database we used Salesforce together with SQL, with the help of queries.

Software Developer at Accenture Hungary Kft.
Budapest, Hungary / Hybrid
October 2022 – January 2023

My main responsibilities:

- Scripting low-code software modules, that were then later on used in bookkeeping software
- Daily reporting
- Daily collaboration with a team of Hungarian engineers

Language used:
English and Hungarian

For the development of the scripts I used:
Javascript, HTML, CSS, SQL

Process Developer at Audi Hungaria Zrt.
Györ, Hungary / On Site
April 2016 – October 2022

My main responsibilities:
- Development and maintenance of organizational processes
- Supervision of the organizational unit in following areas: preparation of decision making, consulting
- Conducting internal audits / audit preparation

Language used:
German and Hungarian

Hobby projects

In my free time, I have gained experience with various technologies and libraries.
These include:
Node.js, MongoDB, ShadCN, Prisma, PostgreSQL, Stripe, and Clerk.

My hobby projects can be checked out on my [GitHub](#), or on my [personal site](#).

Studies

Bootcamps, curses, continuous learning
2020 – today

Besides on the job trainings, I am regularly doing off the job courses on my own for my personal development. These courses cover full stack projects, frontend frameworks, UI libraries, animations, databases, etc.

West-Hungarian University
January 2009 – April 2013

Bachelors degree in Andragogy
